

**NEW!** FR-4 Board-Spacers!

Custom shapes & tooling available!

**FR-4 UL 94V-0 RATED MATERIAL!**

Use as electrical insulators, standoffs, height elevators, etc.!

**Board Spacers**

**Do you need a Board Spacer for your PCB?**

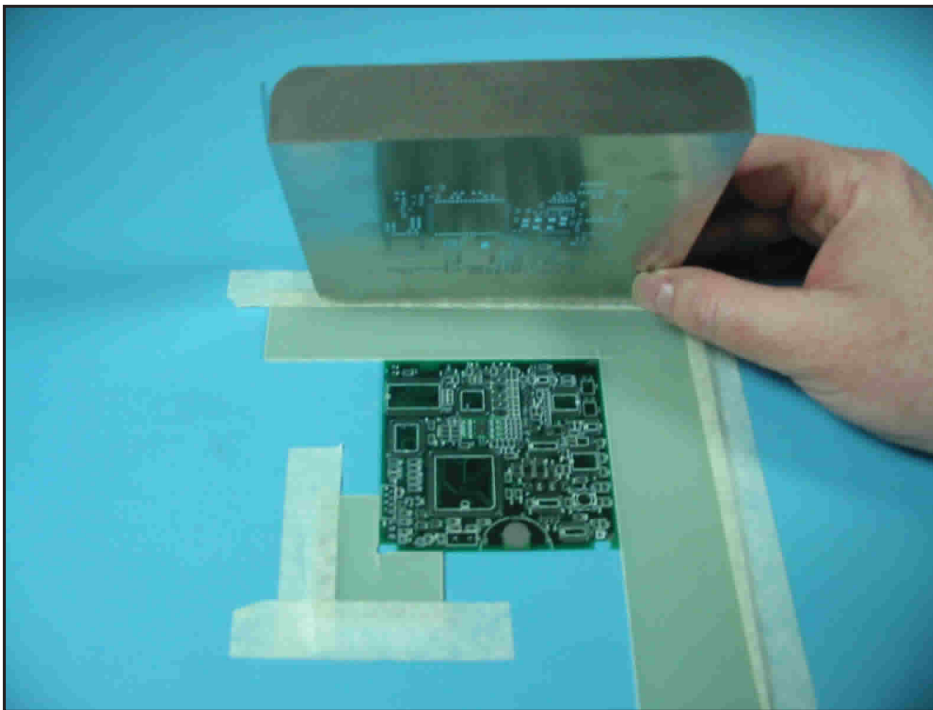

EI is currently offering circuit board spacers which can be used as electrical insulators, standoffs, height adjusting elevators, etc. For more information or to get quote for boardspacers, email us at [design@eiconnect.com](mailto:design@eiconnect.com)

**Proto-Print Stencils**

**Do you need a stencil for your printed circuit board?**

EI's new 'Proto-Print' is an easy-to use, quick solution to the need to print prototypes and low volume runs at the benchtop. It's low-cost and affordable, quick to set up and provides good results when printing solder paste and other electronic materials such as mask or adhesives.

Align, print, lift, remove the PCB, insert another PCB into the same position, and print again. It's that easy! The stencil remains rigid through the Proto-Print's unique design, ensuring proper separation ('snap-off') for good print definition, volume, and uniformity.
